"CORROSION is the global market leader in protecting wind turbine foundations in an environmentally friendly way by using ICCP. Since 2008 we have protected more than 2.500 foundations against corrosion and installed more than 3.100 systems."

"At ProCon, we design, install, and maintain electrical and technical solutions to the global renewable industry. We create value for our customers and partners through open dialogue, understanding, flexibility and through our specialist knowhow."
